

# README

Thanks very much for your valuable time and attention.

## 1. Platform

Our experiments are conducted on a platform with Intel(R) Xeon(R) Gold 6248R CPU @3.00GHz and single GPU NVIDIA TITAN RTX 24GB.

## 2. Environment

```
conda env create -f SIGIR.yml
```

## 3. Running the code

```
cd code
python Demo_Name.py
```

- The detailed configurations can be found in the following demo files and the appendix of the paper.
- The demo names are listed in the following table:

Dataset	Setting	Demo Name
SNIPS	Generalized Zero-shot	snipgzs.py
SMP	Generalized Zero-shot	smpgzs.py
SNIPS	Standard Zero-shot	snipszs.py
SMP	Standard Zero-shot	smpszs.py
