

README

Thanks very much for your valuable time and attention.

1. Platform

Our experiments are conducted on a platform with Intel(R) Xeon(R) Gold 6248R CPU @3.00GHz and single GPU NVIDIA TITAN RTX 24GB.

2. Environment

```
conda env create -f ac1.yml
```

3. Running the code

```
cd code
python Demo_Name.py
```

- The detailed configurations can be found in the following demo files and the appendix of the paper.
- The demo names are listed in the following table:

Dataset	Setting	Demo Name
SNIP	Generalized Zero-shot	snipgzs.py
SMP-2018	Generalized Zero-shot	smpgzs.py
SNIP	Standard Zero-shot	snipszs.py
SMP-2018	Standard Zero-shot	smpszs.py
